WE SHAPE THE ENERGY OF FUTURE

Prize for outstanding scientific research in energy field promotes technological development and demonstrates the importance of international energy cooperation between experts from all over the world.

The Global Energy supports research projects, ideas and developments of young scientists under 35 to identify the most promising researchers and stimulate their research for the further development of innovations that contribute to technological progress.

The Global Energy forms a unique platform for the discussion of the most urgent energy issues, working out precise mechanisms and ways of their solution and their communication to the public and the world's leading energy organisations.

THE GLOBAL ENERGY ASSOCIATION

We believe in science beyond borders uniting the world's top experts and scientists to tackle global challenges together. Only joint efforts and effective cooperation can help in facing global challenges and building energy of the future.

Goals are encouragement of leading experts to create innovations and discoveries in the field of energy and developments of international cooperation in the field of science and technology.
